TUNGSTEN
AUTOMATION

Product Summary

Tungsten Output Manager

Intelligent Document Controls and Print Management

Improve Productivity, Security and Compliance with Best-in-Class Document Security Controls

Organizations are challenged to stay abreast and ahead of digital transformation. They need solutions that inject intelligence into their workflows, including their document control and print management work streams, so that they drive business outcomes, cut costs and impact the bottom line. Output Manager delivers the most intelligent governance for your document control and print management needs. Its superior security features help organizations improve document security, minimize inefficiencies and mitigate compliance risks. Output Manager's best-in-class print and document control capabilities infuse process orchestration, including intelligent redaction, and keen re-routing to increase workforce capacity. Output Manager helps protect printed documents and prevents the unauthorized flow of sensitive information.

Key Capabilities

Stringent data and document security - Content Aware

Ability to interrogate the print stream and apply rules stop predefined confidential information from printing is critical.

Advanced workflows

Transform print protocols and document formats in real-time, redirect documents, or modify specified data within a chosen batch of documents to enhance productivity.

Expanded high availability architectures

Support for desktop applications in Citrix Virtual Desktop Infrastructure (VDI), remote printing capabilities, and expanded high availability architectures.

Extended mobile capabilities

Multiple ways of authenticating using a mobile device, including NFC/Bluetooth authentication.

"We were able to cut down the number of printers at our new headquarters by 64 percent, while reducing our print costs and further securing our print environment..."

Corporate Services Manager,
Amcor

Scalable, high-availability architecture

Offers architecture that scales easily in any environment, from small businesses to large enterprises with multiple offices and thousands of devices.

Ease of management

Completely new, web-based administration and wizard with template-driven configuration tools reduces the time spent configuring a print environment.

Key Features

- Content Aware - Document inspection and interrogation
- Detection and potential redaction of PII or confidential data based on individualized configuration
- Centralized print management and scripts that standardize documents across multiple print centers
- Intelligent document controls, along with print audit trail and reporting
- Secure document workflow, including Citrix VDI environments
- Expanded high availability
- Encryption for data at rest
- Print Stream / Protocol Conversion
- Dynamic Print Image Overlay and Stamping
- Supported in Private Cloud

Benefits of Output Manager

Reduce the risk of failed compliance audits

- Identify or remove sensitive information prior to printing
- Remove document from the normal workflow, preventing printing
- Stop certain items from being printed if they contain predefined confidential information
- Establish chain of custody documenting who has accessed or printed information
- Encrypt your file store for files that have printed or are waiting to print to protect data at rest
- Retain electronic copies of printed documents to meet compliance requirements

Mitigate and minimize security risks with heightened document security features

- Change user behavior by adding a watermark or information showing document ownership
- Keep confidential data secure with document inspection and document transformation
- Identify the rightful owner of documents, preventing unauthorized flow of sensitive information
- Enable mobile authentication using our new Multi card reader

Add workforce capacity, and reduce print management inefficiencies and costs

- Convert print streams from one protocol to another to enable interoperability across diverse printing platforms (such as printing from non-Windows applications to standard PCL printers).
- Provide tools for simplifying and automating time-consuming and challenging workflows
- Centralize print management, which lowers the cost of hardware
- Support the mobile workforce by enabling information print, capture, processing and routing from a mobile device
- Normalize incompatible document formats

Output Manager process orchestration capabilities enable a secure back-office printing experience. It secures and manages the way information is printed and routed, thereby increasing workforce productivity and impacting your bottom line.
